

Senior Security Design Consultant, Ottawa ON

Security professionals agree: Planned, strategic investment today costs less than crisis management tomorrow. And no amount of money can patch a damaged reputation. Tiree Security is a leading security lifecycle management company. Whether it's a Threat and Risk Assessment, a Security Design Brief, a Security Master Plan, System Engineering, or an Operational Review, we deliver value. Our experts understand the pressures Corporate Security Professionals face today. The Tiree Security portfolio includes commercial, industrial and institutional clients across Canada and we know that threats to data, intellectual property, physical plant, and employees have never been greater. That's why our security planning, design, consulting and training services are invaluable to our customers. No single organization provides the full suite of security lifecycle services offered by Tiree Security. Our experience, expertise, and methods are field-proven. Tiree Security brings experience, technology, and best practices to the table. We understand the challenges of providing security within budgets and timelines. We help manage risk, maintain a security department's reputation, and build confidence within our client organizations.

Mandatory Requirements

- 20 years demonstrated experience in the security industry
- 5 years in a senior leadership role in security or as a member of the management team of an equipment or service provider
- University degree or College diploma from a recognized educational institute
- Advanced knowledge of the architecture, technology and personnel domains of the security function
- Project and client references for major activity areas described below
- PWGSC Security Clearance to SECRET, at a minimum
